Internet Mail Center Manager

MANAGING YOUR MAIL AND SHIPPING HAS NEVER BEEN EASIER

iMCM employs the latest technologies and the internet to improve efficiency and productivity for both outgoing and incoming mail and shipments.

Superior cost management

Compare costs and choose any carrier - domestic or international - right from the desktop using the Desktop Mail Center™ (DMC). Even add local and regional carriers and courier services for maximum flexibility and cost savings.

- MAC Certified (USPS Manifesting)
- UPS OnLine® compliant
- FedEx® Certified Solution Provider
- Airborne® on-line certified
- Create and track "eDelivery Confirmation" and eCertified services
- Print bar coded "eDelivery Confirmation" labels, and prepare certified mail forms
- Generate "Firm Mailing Book" (USPS Form 3877)
- Generate and print management reports anytime

Internet enabled tracking

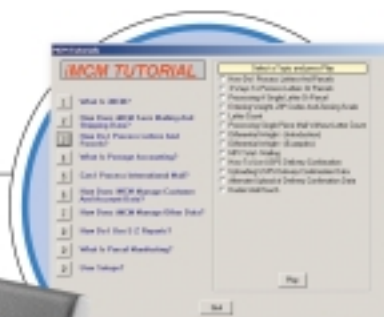

Fully supported internet access to USPS, FedEx, UPS, and Airborne for instant access to tracking and delivery status on-line.

International shipping support

The iMCM on-line International Mail Advisor makes sure your shipment meets all rules and regulations for international deliveries, saving you time and money!

SELECT THE CARRIER THAT'S RIGHT FOR YOU

Self training

iMCM is incredibly easy to learn. Over 60 self-running tutorial movies enable operators to train themselves. And the entire User's Manual is integrated into the software, so answers are always at your fingertips.

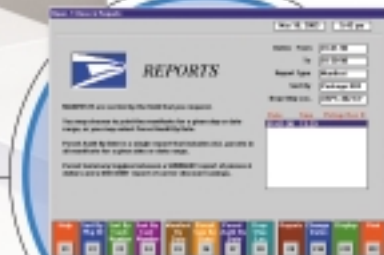

Easy to operate

Colorful and intuitive graphical user interface screens make it even easier to use. Touch screen prompts and function keys provide instant access to primary functions such as rates and utilities. And carrier screens contain complete information to ensure optimum productivity and economy.

Are your carriers up to PAR?

Performance Analysis Reports™ (PAR) automatically check the carrier performance and status of your packages. Email notifications are automatically generated to keep the sender aware of shipping status.

Customized tracking and reporting

A broad range of accounting and carrier-specific tracking reports can be displayed and printed at any time. With the touch of a button, iMCM will create a summary or audit for an individual account, a group of accounts, or all accounts. These features enhance management control and increase visibility of shipping costs and data. Connectivity to a back office system is available in a variety of popular formats.

AUTOMATIC UPDATES AND UPGRADES

iMCM provides you with SoftwareCare™ that automatically updates your system with the newest features and rate changes. These upgrades are released on CD-ROM periodically throughout the year.

Desktop Mail Center™

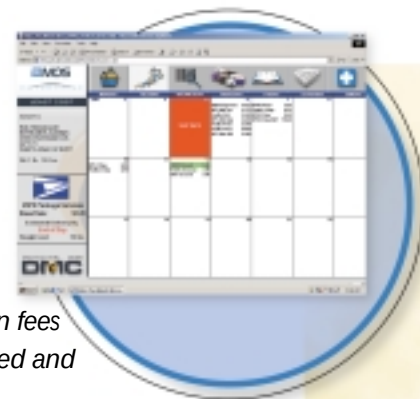

FULL VISIBILITY END-TO-END

The Desktop Mail Center™ extends the power of iMCM to the desktop, reducing costs and adding control. From the moment the originator chooses a carrier to the moment your mail is delivered, each package can be located and tracked throughout the entire shipping process.

DESKTOP MAIL CENTER™

The process begins at the desktop.

- Originator enters destination, timing, and preferred carrier
- System validates address to reduce carrier address correction fees
- Bar Code routing slip is generated and clipped to the package
- Pick-up request can be sent to mail center
- Package is routed to mail center

MAIL CENTER

Each package is weighed, scanned, and labeled when it reaches the mail center.

- Item placed on scale to verify accurate weight
- Scan recalls all information entered at desktop – no need to re-enter data
- Carrier compliant shipping label is printed
- Package is ready for carrier pick-up

INTERNET TRACKING AND DELIVERY CONFIRMATION

Locate your package anytime, anywhere.

- System automatically researches and provides status of the last item sent from the desktop
- Automatic link to carriers for item tracking
- Email confirmation with delivery information

ADMINISTRATIVE TOOLS

iMCM has the ability to control functions based on user log-on

- Control or reduce expensive overnight carrier use
- Reduce carrier Address Correction Fees
- Automatic cost capture of appropriate department chargeback
- Reduce mail center call load by enabling package tracking and reporting at desktop
